

# Considerations for Commercial and High-Strength Wastewater & the New NH Well Water Board Rules - What Septic Professionals Need to Know

Join the GSDI board and other members and colleagues for a quick GSDI board of directors meeting followed by a continuing education program before dinner, enjoy your dinner entrée and dessert, then sit back for a closing continuing education program.

**Tuesday, August 29, 2017**  
**Derryfield Restaurant**  
**625 Mammoth Road**  
**Manchester, NH**

**GSDI Board Meeting: 4:30-5:00 p.m.**  
**Program #1: 5:00-6:45 p.m.**  
**Plated Dinner: 6:45 p.m.**  
**Program #2: 7:30 – 8:45 p.m.**

## Program Information: (Each program will conclude with a 15-minute Q & A Session)

**Program 1:** If you follow the NHDES rules (“The Cook Book”) and common practices, are you designing and installing a leach field that will last or fail? Gary Spaulding of Advance Onsite Solutions will cover road-tested considerations when designing for commercial and high-strength wastewater. Among the items he will address are: Does the state’s Perc Rate sizing chart address commercial systems? Do the current rules for sizing grease traps and septic tanks meet the needs of your clients? Should the grease interceptor baffle always extend to within 6” to 12” off the bottom for all uses? Is the 25% rule for pumping interceptors in tune with today’s uses? Are you taking into account all of the water actually going into the EDA? Do residential homes have high-strength wastewater and what are some of the factors you need to know to make that determination. Matters of installing commercial and high-strength wastewater systems will be included. **Program 2:** We welcome Rick Schofield, PG, Water Well Program Manager, NHDES and Roger Skillings, Skillings & Sons in Amherst for a discussion of the new NH Water Well Board rules that went into effect back in March. They will focus on areas of concern to septic professionals, particularly when it comes to siting systems and compliance with well radii requirements. *(Program approved by NHDES for 3.0 continuing education contact hours for installers and designers.)*

**Cost: \$50 per person for GSDI members/employees/guests \$75 per person for non-members (includes attendance certificate)**

**Registration by August 23!** To register on line (preferred) with a credit card either click here or go to [gsdia.org](http://gsdia.org) and use the “Register Here” link shown on our home page or on the events calendar on August 29. You can still pay by check when you register online. Just click the pay by check and mail it in separately. You can register up to four people online.

To register via mail, please use the application on the other side of this page.

GSDI Tuesday, August 29, 2017 Membership Meeting  
Derryfield Restaurant, Manchester, NH (RSVP by August 23)
