Granite State
Septic System Evaluator Program
53 Regional Drive, Suite 1
Concord, NH 03301

Granite State Septic System Evaluators Program

The purpose of the Septic System Evaluators Program is to establish a minimum level of standard septic system evaluation procedures, with the goal of producing consistent and objective inspections by septic system professionals in New Hampshire. This program was developed by the Granite State Designers and Installers Association with cooperation from the N.H. Department of Environmental Services. Development of this program started in 2001, with the first class of evaluators receiving their designations in 2005.

The NH Board of Septic System Evaluators accepts this program. Individuals who pass this program must then complete the Application for Certification from the NH Board of Septic System Evaluators for consideration to become a licensed septic system evaluator.

Information about becoming a NH Licensed Septic System Evaluator is located on the following website:

www.oplc.nh.gov/septic-evaluators

Training Program

The training program consists of a two-day course. The first day is in a classroom setting. The instructors follow a manual that is given to all participants. The topics they discuss include gathering records and data, plan reading, evaluation methodology, septic tanks and treatment tanks, and results of evaluation and interpreting your observations. In addition, the manual serves as a reference with such items as a glossary of terms, a conversion chart, and the N.H. Department of Environmental Services septic system design rules.

The second day is a field session where the participants go to one or more sites and view the aging process of a septic system. A field exam will be given to evaluate the various components to the systems.

After the completion of the two-day course, participants are given a written test. This will take place tentatively on Thursday, May 30, 2019 at the N.H. Department of Environmental Services office located at 29 Hazen Drive in Concord, NH. **This is the only time that this test will be given.** Those who obtain a score of 80 or greater pass the septic system evaluator program.

For those who would like to enroll in this program, an application is enclosed. Additional copies can be obtained on our website: www.GSDIA.org

How to Become a Septic System Evaluator

The next training program will be held on the following dates:

Wednesday, May 15, 2019 Classroom Session

Saturday, May 18, 2019 Field Session & Field Exam

Thursday, May 30, 2019 Written Exam

The classroom session will be held at the IBEW Union Hall located at 48 Airport Road, Concord, NH 03301. The field session will be held at The Homemakers Health Services in Rochester. Enclosed is an application form. The final written exam will be given at the NHDES headquarters in Concord.

Once your application is received with payment, you will be sent information on the two sessions as well as the program manual. The total fee for the program is \$750.

Granite State Designer and Installers Association

Granite State Designers and Installers Association serves as the statewide trade association of septic system designers, installers, maintenance personnel, land use consultants and governmental agency officials within New Hampshire. The association provides a solid, positive voice for the septic system industry and on land use matters here in New Hampshire.
